Is it possible to overcome all the barriers to nanofluids market uptake?

Nanouptake – Overcoming Barriers to Nanofluids Market Uptake (COST Action CA15119) aims to create a Europe-wide network of leading R+D+i institutions, and of key industries, to develop and foster the use of nanofluids as advanced heat transfer/thermal storage materials to increase the efficiency of heat exchange and storage systems.

Event#1 gets together a hundred specialists from 23 countries

During the last week of October 2016, more than a hundred specialists in nanofluids and thermic transport have participated in the first event of Nanouptake, with a successful integration of the 4 Working Group Meetings (heating, cooling, storage and boiling & solar), a Management Committee Meeting and a Training School.

Launch of the STSM for the 1 st Grant Period

Short Term Scientific Missions (STSM) aim to strengthen the COST Action by allowing scientists to go to an institution in another COST country to foster collaboration, to learn a new technique or to take measurements using advanced instruments and/or methods. In the 1 st Grant Period, 9 STSM have been approved to be carried out from January to April 2017.

ESNf2017: Announcement and call for abstracts

The 1st European Symposium on Nanofluids (ESNf2017) will be held during 8 -10 October 2017 in Lisbon. Under the auspices of Nanouptake (CA15119), it will concentrate on fundamentals and applications of nanofluids, molten salts and liquid based nanosystems. Book of abstracts and selected contributions will be published in a special issue of JCR journal.
